Amazon FBA Prep Checklist

Before your stock goes to an Amazon UK fulfilment centre

Last updated: 10 November 2026

1. Before the goods arrive

- [ ] Confirm each product's listing and FNSKU in Seller Central
- [ ] Check the product's prep category and any category-specific requirements in Seller Central
- [ ] Agree with your prep warehouse who creates the shipment plan and when
- [ ] Send the warehouse the packing list, SKU details and units per SKU

2. Unit preparation

- [ ] Apply an FNSKU label to every unit, unless the product is eligible to use its manufacturer barcode
- [ ] Cover or remove any other scannable barcodes on the unit
- [ ] Bag, box or protect items that could be damaged, leak or come apart in transit
- [ ] Mark sets and bundles so they are not split and sold separately
- [ ] Check expiry-dated products are labelled in the format Amazon requires

3. Cartons and delivery

- [ ] Pack cartons within Amazon's current weight and size limits
- [ ] Apply the shipment carton labels Amazon generates to each carton
- [ ] Palletise and label pallets if sending a pallet shipment
- [ ] Book delivery to the assigned Amazon UK fulfilment centre
- [ ] Track check-in until the stock shows as available for sale

> Amazon updates its prep and packaging requirements. Always check the current rules in Seller Central for each product. LondraDepo is not an official Amazon partner.
